The Finishing Touch

Convenient online fanfolder

Océ 2400 fanfold

you can

Whether you're an architect checking designs or an engineer printing out work drawings, you want your drawings quickly. Without wasting time sorting, trimming and folding them. So you can easily find the information you need. Get the easy finishing touch with the Océ 2400 online fanfolder.

Save time with online folding

With this system, you can immediately pick up neatly fanfolded colour and monochrome drawings and extra-long plots from the printer. In a very short time frame you are able to find your drawings and continue with your main tasks. As the prints are already fanfolded, senior staff such as engineers and architects do not have to waste their time folding the drawings. Say goodbye to creased pages and time wasted in wrestling with awkward drawings. Reading a set of fanfolded documents is as easy as turning the pages in a book, versus handling large flat sheets. This is a real time saver when different users are printing on one system.

Handle new applications with your printer

Now you can quickly produce ready-to-use fanfolded maps, such as cartographic and topo-cadastral maps, using the narrow fold option, which can fanfold documents with a minimum width of 100 mm (4").

Long plots of 6000 mm (236") or more - common for manufacturing and utilities - can be easily handled as well. This system has a special program that produces one compact package for extra-long documents.

Easy folding from your desktop*

For extra convenience, you can choose the folding options you want right from your desktop. Simply use the Océ Windows® Printer Driver or the Océ job submission tool Océ Print Exec® Workgroup (PEWG) to make it happen.

Keep your desk clean and organised

Work more productively with neatly folded documents, organised according to your own system. No more hunting for information. Everything is at your fingertips.
